Download Molecular Genetics Of Host-specific Toxins In Plant Diseases

Plant pathology (also phytopathology) is the scientific study of diseases in plants caused by pathogens (infectious organisms) and environmental conditions (physiological factors). Organisms that cause infectious disease include fungi, oomycetes, bacteria, viruses, viroids, virus-like organisms, phytoplasmas, protozoa, nematodes and parasitic ...Background. Plant disease resistance is crucial to the reliable production of food, and it provides significant reductions in agricultural use of land, water, fuel and other inputs.O reino Fungi é um grupo de organismos eucariotas, que inclui micro-organismos tais como as leveduras, os bolores, bem como os mais familiares cogumelos.???????
