

# Download Art Of Special Effects

Phantom Effects Special Effects Make-up Technicians was founded in 1997 by Aaron Peerless who was professionally trained in special effects make-up in Toronto under Randy Daudlin at Illusions Unlimited Inc. Special effects (often abbreviated as SFX, SPFX, or simply FX) are illusions or visual tricks used in the film, television, theatre, video game and simulator industries to simulate the imagined events in a story or virtual world. Our Special Effects Theater is a state-of-the-art 4D theater, complete with comfy seats that rumble, shake, and deliver other surprises. The cinema projector generates 34,000 lumens, giving you a bright, crisp image on the big screen. It's truly an experience to remember! Learn special effects makeup without going to makeup school from Dick's hand-picked faculty of top Hollywood professionals. Dick's Advanced Professional Makeup Course has more Academy Award winning and nominated graduates than all of America's makeup schools combined.
