Crocodylians: Natural History and Conservation is the Internet's largest crocodile site, established in 1995. Written by a crocodile specialist, it's an ever-growing database of everything you need to know about crocodiles, including all the different species, their biology, conservation, how they talk, and even their captive care. Crocodiles and alligators belong to a group of reptiles called crocodylians, which are the largest of the living reptiles. Of the 23 different species of crocodylians in the world, 2 species are native to the United States, and south Florida is the only place where both of these species coexist. The Many people are unaware that there's a difference between alligators and crocodiles and use both terms interchangeably to describe any large water-dwelling lizard with big teeth. Crocodiles (subfamily Crocodylinae) or true crocodiles are large semiaquatic reptiles that live throughout the tropics in Africa, Asia, the Americas and Australia.
