

# Download Modern Deep Sea Trawling Gear

A fishing trawler is a commercial fishing vessel designed to operate fishing trawls. Trawling is a method of fishing that involves actively dragging or pulling a trawl through the water behind one or more trawlers. A fishing net is a net used for fishing. Nets are devices made from fibers woven in a grid-like structure. Some fishing nets are also called fish traps, for example fyke nets. The deep-sea trawl fishery. The deep-sea trawl fishery operates on well established trawl grounds around the South African coast, extending from the Namibian border on the west coast to the extreme eastern part of the Agulhas Bank near Port Elizabeth. The Amalal Columbia leads the world in modern fishing technology, having undergone a complete rebuild in 2013. She was purchased brand new in 1993, and has lead the way in sustainable deep sea fishing practices ever since.
