

Download Nodulation And Nitrogen Fixation

Abstract. Biological nitrogen fixation is a phenomenon occurring in all known ecosystems. Symbiotic nitrogen fixation is dependent on the host plant genotype, the Rhizobium strain, and the interaction of these symbionts with the pedoclimatic factors and the environmental conditions. Understanding the process of Nodulation for PLB 112. Nodulation and nitrogen fixation in chickpea (*Cicer arietinum* L.) under salt stress - Volume 87 Issue 3 - V. Balasubramanian, S. K. Sinha Skip to main content We use cookies to distinguish you from other users and to provide you with a better experience on our websites. Soybean Root Nodulation and Nitrogen Fixation Soil pH is below 6.0. Greater response from inoculants can be expected in fields with a pH below 6.0.
