

# Download The Berlin Creative Industries An Empirical Analysis Of Future Key Industries

1. INTRODUCTION. Since the 1990s, information and communications technology (ICT) has been perceived as the essential technology for economic development, and ICT industries themselves have been growing exceptionally fast. Dr Victoria Armstrong was Senior Lecturer and Director of Education and Social Science at St. Mary's University, Lond... more Dr Victoria Armstrong was Senior Lecturer and Director of Education and Social Science at St. Mary's University, London from 2008-2018. Sociology is the scientific study of society, patterns of social relationships, social interaction, and culture of everyday life. It is a social science that uses various methods of empirical investigation and critical analysis to develop a body of knowledge about social order, acceptance, and change or social evolution. Design thinking refers to the cognitive, strategic and practical processes by which design concepts (proposals for new products, buildings, machines, etc.) are developed by designers and/or design teams.
